INTERSTATE 11 TIER 1 ENVIRONMENTAL IMPACT STATEMENT (NOGALES TO WICKENBURG)

MAY 2017

The Arizona Department of Transportation (ADOT) and the Federal Highway Administration (FHWA) are hosting public meetings to present corridor alternatives for Interstate 11 between Nogales and Wickenburg.

YOUR INPUT IS NEEDED!

Meeting attendees will be able to review and comment on the proposed alternatives. The alternatives were developed as part of the environmental study based on:

- input from the agency and public scoping meetings held in 2016
- technical analysis
- findings from previous studies
- public comment through postal mail, email, telephone and the I-11 website

WHAT IS I-11?

I-11 is a critical piece of multimodal infrastructure that will diversify, support and connect the economies of Arizona and Nevada. It also could be connected to a larger north-south transportation corridor, linking Mexico and Canada. The purpose of the I-11 corridor is to provide a high-priority, access-controlled transportation corridor that has the potential to enhance the movement of people and freight, while facilitating regional connectivity, trade, communications and technology.
